Redmine - Patch #29160
Remove unused and broken method CustomField.visibility_condition

2018-06-29 14:48 - Holger Just

Category:	Code cleanup/refactoring		**Estimated time:**	0.00 hour
Target version:	4.0.0			

Description

The class method was introduced in r12012 along with the instance method CustomField#visibility_by_project_condition. The method's body seems to follow the idea of the instance method but misses a lot of data required by it, including the user and the project_key. As such, the method would always throw an exception when called.

Since the method is not tested, is never called by Redmine anywhere, and is unusable anyway, we can simply remove it as done by the attached patch.
