

Redmine - Defect #29418

User cannot set version sharing to hierarchy or tree

2018-08-21 22:25 - Gustavo Regal

Status:	New	Start date:

Target version:		Affected version:	3.4.6
Resolution:			
<b>Description</b>  I have a role that has the Manage versions permission. It is called "Analista/desenvolvedor".  Then I have a project in which a user is assigned to the role "Analista/desenvolvedor". And a subproject with the @Inherit members" option checked.  When that user tries to create a new Version, the only possible values in Sharing are "None" and "Subprojects".  Then I have another project with similar configuration in which the user <u>can</u> set any value to the Sharing option.  I'm considering this to be a defect because didn't find anything in the docs but the permission Manage versions in roles configuration. Believe other aspects should not interfere.  Environment: Redmine version3.4.6.stable Ruby version2.3.7-p456 (2018-03-28) [x86_64-linux] Rails version4.2.8 Environmentproduction Database adapterMysql2
