Target version:	
Resolution:	
Description	
Environment: Redmine version 3.3.1.stable Ruby version 2.1.9-p490 Rails version 4.2.7.1	
Adding a custom text field in the setting page that will take recursive data and display in it project overview. Again text box should be empty to take new data and display it below.	
Example : Office Address: [.....] (It may have multiple locations to be displayed with contact details and other)
