Description

As we have

```
  label_issue: Issue
  label_issue_plural: Issues
```

we need

```
  label_activity: Activity
  label_activity_plural: Activities
```

Where this string would be used?

#2 - 2009-03-17 09:30 - Ernad Husremovic

I have changed that on my local branch at every place where we point to set of activities

In my language (bosnian), usage of singular form makes translation quite bad.

Because of that I have translated label_activity as plural, but there are places where singular is necessary (i.e timesheet plugin)

- Status changed from New to Closed

- Resolution set to Wont fix

There's no reason why the menu item (label_acitivity) should be plural (label_activity_plural).
Don't know where this plugin uses this string but it should perhaps use field_activity instead.
