

Redmine - Defect #3016

Multi line editor does not operate correctly in Google Chrome

2009-03-19 15:28 - Vic Krawciw

Status:	Closed	Start date:	2009-03-19
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Wont fix		
Description			
If you edit a note in Chrome typed text appears to overwrite and not insert. However if you scroll right with the cursor key the 'overwritten' text reappears.

I just tried to reproduce this error and was not able to. However I am very new to Redmine and it might therefore have been my failure. Can you maybe give more details?

#2 - 2009-03-29 23:11 - Vic Krawciw

It only appears to happen when you click the pencil icon next to an existing history note in order to edit the existing item. This opens up a kind of cut down editor for the item without the tool bar icons above it. Like I say only seems to happen in Chrome. Firefox & explorer are OK.

Ok, I earlier tried it just with some text in the multi line editor. Now I tried it with a note under history and can confirm the bug.

- Status changed from New to Resolved

I did some research on this and it turns out to be a known bug in Google Chrome and also occurs on other pages. Here is the discussion at Google: <http://www.google.com/support/forum/p/Chrome/thread?tid=47519a2ff2602fbf&hl=en>
I also tested this on a phpBB installation and it has the same behavior when editing.

So I guess this is resolved.
