Description	
There does not seem to be a facility to delete a file once it is uploaded to the "Files" section. Maybe this is just a permissions thing with the guest account on the demo??	

History

#1 - 2007-03-29 15:52 - Jean-Philippe Lang

As it's said on the demo welcome page, the "guest" account has limited rights on the sandbox project. The functionality for deleting files is of course available when having the right permissions.

Please don't post support requests here. Instead, use the help forum here:

Correct.

People with the appropriate permissions can delete files.
