Description

I am testing redmine v4.0.0 and discovered that hovering on some pages does not work.
Till now I discovered that problem on:
- .../projects/ProjectName/settings/activities
- .../admin/projects
- .../users
- .../groups
- .../roles
- .../trackers
and so on....

With hovering I mean: when mouse pointer is over some row on table, whole row is highlited (yellow like in version e.g 2.3).

Without hovering, it is realy difficult to not to make mistake while selecting action on far right on that row, while row label is on the far left.

History

#1 - 2019-01-15 00:32 - Go MAEDA

- Status changed from New to Confirmed

- Target version set to Candidate for next minor release

- Affected version changed from 4.0.0 to 3.4.7

Confirmed the problem in 3.4.7 and 4.0.0. No problem was found in 3.3.9.

#2 - 2019-01-15 05:50 - Marius BĂLTEANU

- Target version changed from Candidate for next minor release to 3.4.8

The fix is quite simple:

```
diff --git a/public/stylesheets/application.css b/public/stylesheets/application.css

--- a/public/stylesheets/application.css

Even if I'm not a fan of "!important", I think that in this case it is ok to use it.

Is same fix applicable to v4.0.0? If not, can you provide fixed file (I assume it is only application.css), to upload to v4.0.0 redmine installation?

Yes, it is.

#5 - 2019-01-16 00:34 - Go MAEDA

- Subject changed from Hovering on most pages does not work as before to Table rows are not highlighted on mouseover on some pages

#6 - 2019-01-16 08:24 - Go MAEDA

- Status changed from Confirmed to Closed

- Assignee set to Go MAEDA

- Resolution set to Fixed

Committed the patch. Thank you all for reporting and fixing this issue.

Please replace application.css with
https://www.redmine.org/projects/redmine/repository/revisions/17801/raw/branches/4.0-stable/public/stylesheets/application.css.

- Status changed from Closed to Reopened

The change r17800 caused undesirable behavior in the issues list. Multiple selected issues are also highlighted on mouseover, so you can not read the text.
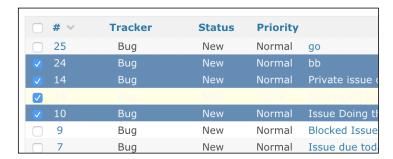

I will revert the change.

Sorry, I'll rewrite the fix.

Attached a better fix. I've checked both scenarios and it works well.

Sorry for my previous fix and a note to myself: "!important is never safe"
