Target version:		Affected version:	4.0.0
Resolution:	Cant reproduce		

Description

We just installed the 4.0.0 Version of Redmine and came across the following bug:
Our Avatar images at journal entries have a big offset and appear nearly outside the page (see attached image: [redmine_css_bug.PNG](#)).

We identified (Browser dev tools) the css-source of the offset as the application.css (the one outside the custom themes) and the following lines:

```
...  
body.avatars-on div.journal {padding-left:32px;}  
div.journal h4 img.gravatar {margin-left:-32px;}  
...
```

We tried enabling the gravatar setting at Administration > Configuration > Display and the offset disappeared.

We experienced this on the following environment:

```
Environment:  
> Redmine version      4.0.0.stable  
> Ruby version         2.4.4-p296 (2018-03-28) [x86_64-linux]  
> Rails version        5.2.2  
> Environment          production  
> Database adapter     Mysql2  
> Mailer queue         ActiveJob::QueueAdapters::AsyncAdapter  
> Mailer delivery      smtp
