Redmine - Patch #3052

Patch for Redmine to persist form state when adding multiple issues

2009-03-26 05:09 - Henrique Bastos

Description

When creating multiple issues in Redmine, I wanted that "save and continue" to persist some of the form states for the next issue.

To do it, I made this little patch that enables a new issue to inspire itself on another issue.

I've tested the patch against the stable releases 0.8.1 and 0.8.2.
