

Redmine - Feature #3058

Show issue history using tabs

2009-03-27 00:07 - Anonymous

Status:	Closed	Start date:	2009-03-26
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	4.1.0		
Resolution:	Fixed		
Description			
<p>We have some issues where there are so many Status/priority/custom fields changes that you have to scroll heaps to find the useful messages that users have written.</p> <p>It would be nice to be able to filter out things from the issue history. For example, next to the "History" text you could have the links "Show All" and "Show Messages". Selecting "Show Messages" would only show non-empty messages. It would also be great to remember the last selected option for the remaining session at a minimum (globally, probably not per issue to avoid overheads), or have a default in the user preferences.</p>

Revision 18271 - 2019-06-20 09:06 - Jean-Philippe Lang

Allow tabs to have a custom action (#3058).

Patch by Marius BALTEANU.

Revision 18272 - 2019-06-20 09:07 - Jean-Philippe Lang

Show issue history in tabs (#3058).

Patch by Marius BALTEANU.

Revision 18273 - 2019-06-20 09:08 - Jean-Philippe Lang

Move changesets to its own tab (#3058).

Patch by Marius BALTEANU.

Revision 18274 - 2019-06-20 09:11 - Jean-Philippe Lang

Add time entries tab to issue history tabs (#3058).

Patch by Marius BALTEANU.

Revision 18275 - 2019-06-20 09:12 - Jean-Philippe Lang

Load changesets and time entries tabs async (#3058).

Patch by Marius BALTEANU.

Revision 18276 - 2019-06-20 09:13 - Jean-Philippe Lang

Load remote tab only once (#3058).

Patch by Marius BALTEANU.

Revision 18277 - 2019-06-20 09:13 - Jean-Philippe Lang

User preference for issue history default tab (#3058).

Patch by Marius BALTEANU.

Revision 18278 - 2019-06-20 09:14 - Jean-Philippe Lang

Remove history label and no data (#3058).

Patch by Marius BALTEANU.

Revision 18281 - 2019-06-20 09:40 - Go MAEDA

Update locales (#3058).

Revision 18311 - 2019-06-22 02:20 - Go MAEDA

"selected" class is wrongly removed from journal edit tabs when switching the issue history tabs (#3058, #31599).

Patch by Marius BALTEANU.

Revision 18328 - 2019-07-12 12:42 - Go MAEDA

Fix the compatibility problem with Internet Explorer 11 (#3058).

Patch by Yuichi HARADA.

Revision 18598 - 2019-10-06 01:57 - Go MAEDA

Fix that "Associated revisions" tab has no content when the user displays comments in reverse chronological order (#32198, #3058).

Patch by José Esteves.

History

#1 - 2009-03-27 00:09 - Anonymous

I didn't see any other issues like this when I submitted, but I just noticed that this is similar to [#3037](#) - not a duplicate, but similar.

#2 - 2009-03-27 00:12 - Anonymous

I also just noticed that if [#3046](#) were to be implemented, then it would work as another filter type in my proposal - "Show Associated Revisions"

#3 - 2009-04-01 05:20 - Paul Quirk

I'm happy with Nick's proposal for filtering as this covers most of the problem I was talking about in [#3037](#).

#4 - 2009-04-01 05:25 - Paul Quirk

One other counter to this would be to set the "Show All" or "Show messages" flag at the role level. You could still have the toggle at the "history" level to override this.

#5 - 2010-09-21 19:40 - Anonymous

This issue seems to have grown stagnant but seems to be very helpful. At a minimum there should be the ability to filter out the history to show only the notes added to an issue (and vice versa).

#6 - 2012-01-04 01:23 - Adam Sneller

+1

There is an [Issue History Tab](#) plugin that works with 1.2.2. But the comment feature is buggy. Of course if anyone wants to take a shot at fixing it...

Here is a link to the issue:

https://github.com/tastapod/redmine_issue_history_tabs/issues/4

#7 - 2012-07-15 23:45 - Kevin O

+1. The way I would envision this is simply, for both default and custom fields, have an option to select whether or not they show in the Issue History.

For instance, we have a custom field called "Order" which we use for a custom backlog view to let product managers sort what's next in the pipeline. They move things around a lot, so the issue histories are cluttered up with perhaps a couple dozen or more messages of "Order changed to xx". Being able to select to hide changes to that field would be great.

#8 - 2015-01-08 13:24 - Go MAEDA

- Related to Feature #15409: Is it possible to view History section in pages? added

#9 - 2015-09-23 09:04 - Go MAEDA

- Related to Feature #8536: Separate notes/comments from issue updates added

#10 - 2015-09-23 09:15 - Go MAEDA

- File show-all-journals.png added
- File show-notes-only.png added
- File show-notes-only.diff added
- Priority changed from Low to Normal

I wrote a patch to implement this issue. This patch introduces a new checkbox "Show notes only". We can hide/show details by checking it.

showing all journals, like current Redmine:

History Show notes only

Updated by **Redmine Admin** 9 minutes ago #1

showing notes only:
show-notes-only.png

#11 - 2015-09-23 15:15 - Go MAEDA

- File show-notes-only-2.diff added

Go MAEDA wrote:

I wrote a patch to implement this issue. This patch introduces a new checkbox "Show notes only". We can hide/show details by checking it.

Updated the patch (code cleanup): [show-notes-only-2.diff](#)

#12 - 2015-09-26 06:08 - Go MAEDA

- Target version set to *Candidate for next major release*

#13 - 2015-11-23 03:56 - Go MAEDA

- File trac-show-property-changes.png added

- Target version changed from Candidate for next major release to 3.2.0

Could this be included in 3.2.0? By this change, users can easily see all conversation on a issue. It increases productivity.

trac already has this feature (see the following screenshot).

#14 - 2015-11-23 13:35 - budo kaiman

- File *RedmineTabs.png* added
- File *JiraTabs.png* added

I don't think a checkbox looks very good there. I'm using the [Redmine Issue Detailed Tabs & Time](#) plugin which adds tabs for different sections. This looks much better than a toggle check and offers more possible functionality. Tabs are used in Jira and it looks much cleaner.

Redmine plugin:
RedmineTabs.png

Jira:
JiraTabs.png

#15 - 2015-11-23 14:04 - Alexander Ryabinovskiy

budo kaiman wrote:

I Agree, Jira's tabs variant is much better. It can be extended to show "Work Log", "Commits" tabs in the future.

#16 - 2015-11-24 08:13 - Sebastian Paluch

+1 for tabs

#17 - 2015-11-24 22:02 - Jean-Philippe Lang

- Target version changed from 3.2.0 to 3.3.0

I think we need a bit more time for this and 3.2.0 is now scheduled for the next week.

#22 - 2016-02-23 19:52 - Marius BĂLTEANU

Hi,

The solution with 2 tabs is good, but in my opinion it'll be very helpful for the users to have also the following tabs available:

- **Spent time**: with all the spent times added to the respective issue (of course, depending on the user rights)
- **Activity**: all the entries without notes

That means 4 tabs in totals:

- All (activity + notes)

- Activity
- Notes
- Spent Times

Maybe also the associated revisions can be added as tab, but I'm not sure about this one :)

If you're agree with this proposal we can contribute with an updated patch which implement the tabs.
Go MAEDA wrote:

- **Activity**: all the entries without notes

That means 4 tabs in totals:

- All (activity + notes)
- Activity
- Notes
- Spent Times

Spent time would be a good tab to have, but Activity should definitely be part of this.

Marius Balteanu wrote:

Maybe also the associated revisions can be added as tab, but I'm not sure about this one :)

Personally, I think that the associated revisions should be a tab and not have the weird little sidebar thing. If the patch to implement tabs is accepted, moving revisions to a tab should be done as a new feature, not part of this.

One general comment that I have about the patch (just from a quick glance, if I missed something let me know) is that the default tab probably shouldn't always be "All". This could probably be handled in a few ways, below are some options (the second being my preferred method):

- Add a default tab setting
- Remember the last tab the user used with "All" as default at first

#24 - 2016-03-30 13:36 - Rupesh J

Hi,

During this implementation, Can you please also consider to provide a hook.

We have already defined some tabs in the ticket history region through a plugin development(currently overriding the corresponding partial).
Thanks.

#25 - 2016-05-07 09:45 - Jean-Philippe Lang

- *Target version changed from 3.3.0 to 3.4.0*

There's still some work to implement what is requested here (additional tabs, hook, memorization of last tab...)

#26 - 2016-05-07 09:51 - Go MAEDA

Jean-Philippe Lang wrote:

There's still some work to implement what is requested here (additional tabs, hook, memorization of last tab...)

I think that we can implement only [show-notes-only-v3.diff](#) in 3.3.0 and other requests in future releases.

#27 - 2016-06-08 15:38 - Dipan Mehta

This is great work going on.

There is another issue where the same was discussed in great detail - [#4487](#) Do check and try to use some of these ideas.

Add related [#4487](#).

#28 - 2016-06-08 15:46 - Go MAEDA

- Related to Feature #4487: Add better presentation of issue status history added

#29 - 2016-08-16 11:07 - Marc D.

Go MAEDA wrote:

I think that we can implement only [show-notes-only-v3.diff](#) in 3.3.0 and other requests in future releases.

We got some issues with time spent feature after applying show-notes-only-v3.diff

If you click on the spent time summit in the issues description (which links to /issues/1111/time_entries) the issues just reloads instead of showing a list of all time entries for the issue.

Anyone else got this problem?

#30 - 2016-10-19 09:30 - Artem -

[Mark Mulder](#), did you manage to resolve the issue with time entries?

#31 - 2017-01-25 09:06 - Jean-Philippe Lang

- Target version changed from 3.4.0 to Candidate for next major release

Still some work to be done.

#32 - 2017-05-01 16:29 - Marius BĂLTEANU

- File 01_allow-tabs-to-have-a-custom-action.patch added
- File 02_show-issue-history-in-tabs.patch added
- File 03_move-changesets-to-its-own-tab.patch added
- File 04_add-time-entries-tab-to-issue-history-tabs.patch added
- File 05_load-changesets-and-time-entries-tabs-async.patch added
- File 06_load-remote-tab-only-once.patch added
- File issue_tabs.png added

I've attached a series of patches that implement this feature. Because the change is quite big, I've split the changes in multiple patches.

01_allow-tabs-to-have-a-custom-action.patch

This patch allows render_tabs to have custom action for onclick and also, make the partial rendering optional. In this way, tabs can use the same div (partial) for displaying content.

02_show-issue-history-in-tabs.patch

This patch display issue history in three tabs:

- All: all journals
- Notes: only journals with notes
- History: only journals with history changes and without notes

The notes tab is default when the tab parameters doesn't exists.

03_move-changesets-to-its-own-tab.patch

This patch moves the associated revisions to a new tab and uses the look and feel from the journals to display the changesets.

04_add-time-entries-tab-to-issue-history-tabs.patch

This patch adds a new tab with the issue's visible spent times. The same look and feel from journals is used. Related to [#5061](#).

05_load-changesets-and-time-entries-tabs-async.patch

This patch changes the way in which the changesets and time entries tabs are loaded in order to use ajax calls only on user request. In this way, we speed up a little bit the issue show page. Journals are still loaded in the same time with the issue.

06_load-remote-tab-only-once.patch

I think it doesn't worth it to make an ajax call each time when the user clicks on changeset or time entries tabs

Let's discuss this implementation for Redmine version:3.5.0 (I think that the change is too big for [3.4.0](#)). In [Zitec](#), we're using from the beginning some plugins that implement the tabs, but each time we had multiple issues with them. I really think that this feature is needed and also, having the tabs async implemented, we can add more features in the future (some examples: affected branches and files from git revisions, time in state..).

Regarding the memorization of last tab, I'm not sure that is a good idea because if I'm on the changeset tab of the current issue, it doesn't mean that I want to see the same tab first when I open the next issue. If it's really required, I prefer to have it configurable.

Any feedback is appreciated (attached is a printscreen with all 5 tabs).

#33 - 2017-05-02 02:43 - Go MAEDA

- Target version changed from Candidate for next major release to 4.1.0

Jean-Philippe Lang wrote:

Still some work to be done.

New patches have been submitted by Marius BALTEANU.
Let's consider implementing this feature.

#34 - 2017-05-02 13:21 - budo kaiman

Any feedback is appreciated (attached is a printscreen with all 5 tabs).

This looks excellent, one small comment I have is that it would be nice to have avatars shown in the "Associated Revisions" tab like they are for other journals.

Regarding the memorization of last tab, I'm not sure that is a good idea because if I'm on the changeset tab of the current issue, it doesn't mean that I want to see the same tab first when I open the next issue. If it's really required, I prefer to have it configurable.

I can understand why you feel that way, but I still believe it would be useful. Particularly, if I wanted to go through the time log or commit history of a bunch of issues, I would scroll through and open them. If the last tab was remembered then I'd only have to change tab once when I started and then change it back to whatever I want to see when I open the next issue after I'm done. If it were a configurable setting then I'd either have to change the tab for each issue I view, or navigate the settings to change the default before and then after, both of which can be a bit cumbersome. If you still feel opposed to it, that's fine but I'd at least like to express why I feel it would be valuable.

#35 - 2017-05-02 23:49 - Marius BĂLTEANU

budo kaiman wrote:

The avatars are already added, but they are missing from the screenshot because the feature is disabled on my local environment.

I can understand why you feel that way, but I still believe it would be useful. Particularly, if I wanted to go through the time log or commit history of a bunch of issues, I would scroll through and open them. If the last tab was remembered then I'd only have to change tab once when I started and then change it back to whatever I want to see when I open the next issue after I'm done. If you still feel opposed to it, that's fine but I'd at least like to express why I feel it would be valuable.

It is a valid point of view. What about having the "Last visited tab" as an option in the default tab setting (along with the tabs)? Basically, each Redmine administrator can set as default tab setting for issues one of the following options: All, Notes, History, Spent time, Associated Revisions and Last visited tab.

#36 - 2017-05-03 13:02 - budo kaiman

Redmine administrator can set as default tab setting for issues one of the following options: All, Notes, History, Spent time, Associated Revisions and Last visited tab.

I think that is a very sensible solution, though I'm not sure if it would be better as a user preference than an administrator setting.

#37 - 2017-05-07 02:18 - Mischa The Evil

- Related to Feature #12194: Source control revisions should be integrated as part of the history added

#38 - 2017-05-31 06:30 - Toshi MARUYAMA

- Related to Feature #5061: Show time log entries in issue history added

#39 - 2017-06-02 10:27 - Mischa The Evil

I really do like the tabbed solution for this issue.

My two cents on the patches provided in note-32 based on a visual scan of the patches and the posted screenshot:

- 'All' tab does not include spent time entries and associated revisions (this seems logical seeing where we are coming from, but it might be unexpected behaviour for an 'All' tab)
 - and if these were to be merged into the 'All' tab too, then it would provide a false overview of issues' journals as their items aren't journals (only notes and property changes are journals)
- to see all the associated revisions of an issue, one now has to click one more time (on the tab) than before (they were immediately visible along the history), which might be a drawback for some (I can live with it though)
- I think that a 'properties' or 'property changes' label for the 'history' tab is better considering its content and the terminology used throughout Redmine (eg. see the label of the issue edit form [which is 'change properties'])
- additional plugin hooks for the spent time and associated revisions tab views are not included
- regarding the last visited tab memoization: I like the solution proposed by Marius in note-35, but, as Budo, I also like to see such a setting as a user preference instead of a system-wide (admin) setting

All in all I'm pretty positive about the patch series. This feature seems to be coming along nicely... Thanks Marius for your work on this.

#40 - 2017-06-27 01:20 - Marius BĂLTEANU

Thanks Mischa for your feedback.

Mischa The Evil wrote:

I really do like the tabbed solution for this issue.

My two cents on the patches provided in note-32 based on a visual scan of the patches and the posted screenshot:

 - and if these were to be merged into the 'All' tab too, then it would provide a false overview of issues' journals as their items aren't journals (only notes and property changes are journals)

1. It is better to rename the 'All' tab with the current label 'History'?

2. It'll be nice to have the time entries and associated revisions merged in an 'All' or 'Activity' tab, but maybe it'll be done in a future version.

- to see all the associated revisions of an issue, one now has to click one more time (on the tab) than before (they were immediately visible along the history), which might be a drawback for some (I can live with it though)
- I think that a 'properties' or 'property changes' label for the 'history' tab is better considering its content and the terminology used throughout Redmine (eg. see the label of the issue edit form [which is 'change properties'])

3. 'Changed properties' sounds good for you?

- additional plugin hooks for the spent time and associated revisions tab views are not included

4. I'll update the patches to include the hooks.

- regarding the last visited tab memoization: I like the solution proposed by Marius in note-35, but, as Budo, I also like to see such a setting as a user preference instead of a system-wide (admin) setting

5. I'll create a new patch for this feature. I think the best way to implement this is to have the both settings: one in admin to configure the default value for new users, and one as a user preference.

#41 - 2017-07-02 12:03 - Marius BĂLTEANU

- File 01_allow-tabs-to-have-a-custom-action_v2.patch added

- File 02_show-issue-history-in-tabs_v2.patch added
- File 03_move-changesets-to-its-own-tab_v2.patch added
- File 04_add-time-entries-tab-to-issue-history-tabs_v2.patch added
- File 05_load-changesets-and-time-entries-tabs-async_v2.patch added

Updated the patch series (01-05) in order to apply cleanly to the current trunk and to include the feedback from Mischa:

- Renamed the tab "All" to "History"
- Renamed the tab "History" to "Property changes"
- Added hooks for changeset and time entries tabs
- Updated tests

Please remove the first version of patches (except 06_load-remote-tab-only-once.patch)

Marius BALTEANU wrote:

Updated the patch series (01-05) [...]

Nice! Thanks for incorporating my feedback. To summarize the remaining outstanding tasks:

- Add setting(s) for memoization of the last visited tab
 - I don't think we need an admin setting as well as a user preference though. I think that only having a user preference will suffice.
- Merge time entries and associated revisions with journals into an 'All' or 'Activity' tab

Please remove the first version of patches (except 06_load-remote-tab-only-once.patch)

Done.

#48 - 2017-07-03 17:05 - Marius BĂLTEANU

Thanks!

Mischa The Evil wrote:

Is on my to do list.

- Merge time entries and associated revisions with journals into an 'All' or 'Activity' tab

I'll work on this after these patches are committed because the changes are quite big, hard to maintain and also, to be honest, I need a confirmation from Jean-Philippe Lang that we're on the right way with the implementation.

Please don't get me wrong. I didn't mean to say that this particular change is a requirement before this patch serial can make it into the core. It is something that could well be handled through a separate issue after integration of this issue. I just wanted to give a summary of things mentioned throughout this issue which are not (yet) covered by your patches.

#50 - 2017-07-04 08:10 - Wim DePreter

If you change presentation of associated revisions, maybe you could keep [#13715](#) in mind?

#51 - 2017-07-07 13:57 - Andrey Lobanov (RedSoft)

- File *01_allow-tabs-to-have-a-custom-action_v2_fixed.patch* added

Here is a fixed version of the patch. While viewing the repository entries, there was some problem - Tabs didn't opening, because of 'onclick' action.

#52 - 2017-09-10 14:19 - Marius BĂLTEANU

- File *07_user_preference_for_issue_history_default_tab_r16963.patch* added

- Assignee set to Jean-Philippe Lang

Andrey Lobanov, thanks for finding and fixing the issue. I reworked your fix a little bit in order to clean up the view file.

I'm attaching the updated patches which cleanly apply on the current trunk ([r16963](#)) and incorporate the changes from [#26638](#) and test fixes for rails 5.

Also, I've finished the last patch for this ticket (*07_user_preference_for_issue_history_default_tab_r16963.patch*) which adds the possibility for the users to select the default issue history tab as preference. The following options are available: notes (default), history, properties, time_entries, changesets and last visited tab.

user_pref.png

Jean-Philippe Lang, I think that I've covered all the required changes and the patches are ready for review. I'm assigning you in order to take a call regarding them (it'll be very useful for me if you can do this as soon as you can because there are a lot of changes and it is hard and time consuming for me to maintain these 7 patches).

#53 - 2017-09-11 12:57 - budo kaiman

This looks great, thanks for all your hard work on this. Hopefully it can be incorporated soon.

#54 - 2017-10-15 09:07 - Go MAEDA

- Related to Feature [#16052](#): Consider a better associated revisions block in the issue tracker added

#55 - 2017-11-08 03:47 - Mischa The Evil

- Related to deleted (Feature [#12194](#): Source control revisions should be integrated as part of the history)

#56 - 2018-01-10 13:42 - Go MAEDA

#57 - 2018-05-13 15:55 - Go MAEDA

- Has duplicate Feature [#13298](#): Grouping issue history (activity) in issue history tabs added

#58 - 2018-07-27 11:39 - Marius BĂLTEANU

- Target version changed from 4.1.0 to 4.0.0

I'm setting target version to [4.0.0](#) in order to get at least a feedback from Jean-Philippe Lang. It is a long awaited feature, with more than 30 watchers, a lot of related/duplicated issues and patches dragged from version 3.2.0. Also, I'm sure that once we implement this feature, we can make a lot of improvements on top of it.

I'm happy with this decision.

#76 - 2018-11-26 06:23 - Bernhard Rohloff

As it's the end of November now and the release hasn't happened yet, may we reconsider an integration of this feature in 4.0.0 again? The issue is quite old and provides a high UX improvement which I think many folks would love to see in the next major release.

No, you can't, it is Jean-Philippe decision on this feature.

In the meantime, I've updated the patch series to apply cleanly and I've added a new patch ([0008-Remove-history-label-and-no-data.patch](#)) to remove the history label and the "No data" block when there are no history/spent times or revisions.

#88 - 2019-06-20 09:26 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Fixed

Thanks Marius for updating the patches. They are now committed, thanks for your hard work on this!
