Marius, could you review this fix?

Looking right now, maybe we can include the fix for this issue in the next release ([4.0.3](#)).

The proposed patch is not enough, it only fixes the issue in the notes block.

The description is also affected, please the below screenshot:
[description.png](#)

The old fix before Edit/Preview tabs was the rule 'min-width': inherit; from below:

```
fieldset.preview {
  margin-top: 1em;
  min-width: inherit;
  background: url(../images/draft.png);
}
```

My proposal is to backport the fix to all fieldset elements:

```
vagrant@jessie:/vagrant/project/redmine$ git diff
diff --git a/public/stylesheets/application.css b/public/stylesheets/application.css

I've tested in various pages in Chrome and I didn't see any issue, but any feedback is welcome.
