

Redmine - Patch #31276

Serialize group_by and totalable_names in Query#as_params

2019-04-29 11:07 - Jens Krämer

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Issues filter	Estimated time:	0.00 hour
Target version:	3.4.11		
Description			
Problem			
<ul style="list-style-type: none">- configure a (on the fly, not saved) issue query, group by anything and have any totals displayed- click on an issue in the resulting issue list- go back to the list via the x of y link between the prev/next links			
Both grouping and configured total values are now lost since these settings are not contained in the URL parameters of the link.			
Solution			
By adding :group_by and :t keys to Query#as_params, the query configuration is fully preserved (build_from_params already checks for those keys).			
Patch courtesy of Planio			

Associated revisions

Revision 18103 - 2019-04-30 05:10 - Go MAEDA

Changes Query#as_params for more complete serialization (#31276).

Patch by Jens Krämer.

Revision 18104 - 2019-04-30 05:29 - Go MAEDA

Merged r18103 from trunk to 4.0-stable (#31276).

Revision 18105 - 2019-04-30 05:33 - Go MAEDA

Merged r18103 from trunk to 3.4-stable (#31276).

History

#1 - 2019-04-29 14:19 - Go MAEDA

- Target version set to 3.4.11

Confirmed the problem and the attached patch works fine. Setting the target version to 3.4.11.

#2 - 2019-04-30 05:34 - Go MAEDA

- Status changed from New to Closed
- Assignee set to Go MAEDA

Committed the fix. Thank you for offering the patch.
