| I think that multiselect "+" button for the filter is too small, so it is hard to find and click. To improve that, I made the images which are larger than the previous one. | | | |

The size of the icons you created is 20x20px, but most icons in public/images directory are 16x16px.

Could you make 16x16px icons? It is probably OK if you cut the margins.
