<b>Description</b> Users have to fill in name and password every session which could be a boiling thing for them. If there's a checkbox which allows user to decide whether login status lasts forever or not, that could release that heavy burden on users.  Thanks -- caocao

I agree that having persistent logins would be nice. :)

Feature added in rev 514.

It's disabled by default. To enable this feature, go to administration settings and set the "Autologin" option.
