Target version:		Affected version:	4.0.3
Resolution:			
Description			
<p>If I set the relative_url_root in config/environment.rb using Redmine::Utils::relative_url_root = "/redmine" or ActionController::Base.relative_url_root = "/redmine" or with an ENV of RAILS_RELATIVE_URL_ROOT=/redmine</p> <p>the script and link elements correct have the /redmine/... in the src and href fields but the href in the anchor (a) elements like for menus (the only ones I have looks at yet) do not have the leading '/redmine'</p> <p>I am running a brand new install of redmine on fedora 29 with postgersql 10.7 and a info page of Information</p> <p>Redmine 4.0.3.stable Default administrator account changed (checked) Attachments directory writable (checked) Plugin assets directory writable (./public/plugin_assets) (checked) RMagick available (optional) (checked) ImageMagick convert available (optional) (checked)</p> <p>Environment: Redmine version 4.0.3.stable Ruby version 2.5.5-p157 (2019-03-15) [x86_64-linux] Rails version 5.2.2.1 Environment production Database adapter PostgreSQL Mailer queue ActiveSupport::QueueAdapters::AsyncAdapter Mailer delivery sendmail SCM: Subversion 1.11.1 Mercurial 4.5.3 Bazaar 2.7.0 Git 2.20.1 Filesystem Redmine plugins: no plugin installed</p>
