Redmine - Feature #315

Allow user to "change" issue status to the same status.

2007-04-04 06:35 - Jeffrey Jones

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:			
Resolution:			

Description

We will be using the "Assigned" status quite a lot.

A typical progression could be

Issue raised, assigned to PM
issue reassigned to Designer
issue reassigned to developer
issue marked as resolved and assigned to QA.

I really like the intermediate form that appears when you change an issue status as it contains all the relevant details
and when you look at the issue history it appears under one history entry.

If I want to reassign an issue to another user without changing the status then I cannot use this intermediate form,
I have to add a comment then go and edit the issue. This is cumbersome and clutters up the history.

What we would like is for the "change status" dropdown to include the current status, this will allow us to
reassign things easily using the intermediate page.

You're absolutely right. Done.
