

Redmine - Defect #31657

Update capybara (~> 3.25.0)

2019-07-02 08:36 - Takenori TAKAKI

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Gems support	Estimated time:	0.00 hour
Target version:	4.1.0	Affected version:	
Resolution:	Fixed		
Description			
I got the following warning while testing test/system. This is caused by a version of capybara in Gemfile ('~> 2.13').			
<pre>\$ rake test TEST=test/system : WARN Selenium [DEPRECATION] Selenium::WebDriver::Error::UnhandledError is deprecated. Use Selenium ::WebDriver::Error::UnknownError (ensure the driver supports W3C WebDriver specification) instead. WARN Selenium [DEPRECATION] Selenium::WebDriver::Error::ElementNotVisibleError is deprecated. Use Selenium::WebDriver::Error::ElementNotInteractableError (ensure the driver supports W3C WebDriver specification) instead. :</pre>			
From the above, How about removing Capybara's version?

Revision 18330 - 2019-07-24 12:14 - Go MAEDA

Update capybara (~> 3.25.0) (#31657).

Patch by Takenori TAKAKI and Pavel Rosický.

History

#1 - 2019-07-02 08:52 - Go MAEDA

- Subject changed from DEPRECATION WARNING: Selenium::WebDriver::Error::***Error is deprecated. to Update capybara (~> 3.25.0)
- Category set to Gems support
- Target version set to 4.1.0

Thank you for reporting this issue.

I think it is better to pin the version to the tested one. Unintended update of gems may break test.

```
diff --git a/Gemfile b/Gemfile

I have the same opinion as you.

When I ran the test, I needed to fix the test code.

So I posted the patch again.

#3 - 2019-07-22 10:22 - Go MAEDA

- File failures_test_issue_trackers_description_should_select_tracker.png added

IssuesTest#test_issue_trackers_description_should_select_tracker randomly fails.

```
.....[Screenshot]: tmp/screenshots/failures_test_issue_trackers_description_should_select_
tracker.png
F
```

Failure:

```
IssuesTest#test_issue_trackers_description_should_select_tracker [/Users/maeda/redmines/redmine-trunk/test/sys
tem/issues_test.rb:350]:
Expected false to be truthy.
```

```
bin/rails test test/system/issues_test.rb:344
```

#4 - 2019-07-23 00:46 - Pavel Rosický

- File issues_test.rb.patch added

Go MAEDA it fails because of scroll animations <https://github.com/redmine/redmine/blob/master/public/javascripts/application.js#L28>

#5 - 2019-07-24 11:26 - Go MAEDA

No errors are observed after applying your patch. Thanks.

#6 - 2019-07-24 11:48 - Go MAEDA

- Subject changed from Update capybara (~> 3.25.0) to Update capybara (~> 3.15.1)

Capybara 3.25.0 cannot be used because Redmine 4.1.0 supports Ruby 2.3 but Capybara 3.25.0 does not. The last version of Capybara which supports Ruby 2.3 is 3.15.1.

#7 - 2019-07-24 11:59 - Go MAEDA

- Subject changed from Update capybara (~> 3.15.1) to Update capybara (~> 3.25.0)

- Assignee set to Go MAEDA
- Resolution set to Fixed

Committed the patch. Thank you.

#9 - 2019-11-12 05:02 - Takenori TAKAKI

- Status changed from Closed to Reopened

The latest version of Capybara (3.29.0) has been released, so I updated the gem and re-tested the "test/system". And I confirmed that all tests passed.

Thank you for testing the latest version of Capybara. But 4.1-stable branch has been created and Redmine 4.1.0 is about to be released, so I have opened a new issue [#32453](#) for Redmine 4.2.0.
