

Redmine - Defect #31831

Back url parse in validation

2019-07-31 12:04 - Tibinko H

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Marius BĂLTEANU	% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:	6.0.0	Affected version:	4.0.4
Resolution:	Fixed		
Description			
Hello,			
for example on issues screen, when you apply filters, it generates an url containing:			
<code>utf8=</code>			
Because of this <code>bulk_edit</code> (for instance) is unable to redirect back to this url. The reason is a function in <code>application_controller.rb - validate_back_url</code>			
<code>URI.parse(back_url)</code> is unable to parse the special character mentioned above.			
The quicke workaround would be			
<code>URI.parse(URI.encode(back_url))</code>			
but i am not sure that is sufficient.

Revision 22710 - 2024-02-14 00:17 - Marius BĂLTEANU

Replaces `URI.parse` with `Addressable::URI.parse(url)` to enhance robustness of `validate_back_url` (#31831).

Patch by Go MAEDA (@maeda).

History

#1 - 2019-08-01 08:09 - Mizuki ISHIKAWA

It looks good.

I have also suggested the same fix ([#31552#note-2](#)).

#2 - 2019-08-01 10:20 - Tibinko H

Oh, ok. Did not see that, I am going to put this issue to resolved then.

It was committed another solution in that ticket.

Is it not exactly the same as I wrote above?

I think this problem has not been solved yet.

Sorry, my comment([#31831#note-1](#)) may have misled you.

In [#31552](#) issue, [#31552#note-3](#) changes were finally committed, not [#31552#note-2](#) changes. [#31552#note-3](#) changes were a partial fix and does not solve the bulk_edit problem.

```
URI.parse(URI.encode(back_url))
```

I thought that your suggestion for solving the problem that occurs with bulk_edit is good.

Tibinko H, thank you for reporting this issue.

Here is a diff of your workaround.

You can fix this problem by preventing Rails from appending a "utf8" parameter to form URLs. This can be achieved by setting `config.action_view.default_enforce_utf8` to false.

<https://guides.rubyonrails.org/v7.1/configuring.html#config-action-view-default-enforce-utf8>

We can safely remove the "utf8=" parameter. This is because this is a [workaround](#) for Internet Explorer <=8 and Microsoft and Redmine no longer support the browser.

- Related to Feature #40190: Stop appending the utf8 checkmark parameter to form URLs added

#11 - 2024-02-13 10:16 - Go MAEDA

- File 31831.patch added

I have opened [#40190](#) and posted the patch pasted in [#note-9](#).

Apart from that patch, I suggest replacing `URI.parse` with `Addressable::URI.parse(url)` to address the reported issue. This change is useful for handling URLs containing non-ASCII characters, as demonstrated below.

```

irb(main):001> url = 'http://www.example.com/?utf8='
=> "http://www.example.com/?utf8="
irb(main):002> URI.parse(url)
/Users/maeda/.rbenv/versions/3.1.4/lib/ruby/3.1.0/uri/rfc3986_parser.rb:20:in `split': URI must be ascii only
"http://www.example.com/?utf8=\u2713" (URI::InvalidURIError)
irb(main):003> Addressable::URI.parse(url)
=> #<Addressable::URI:0x9b14 URI:http://www.example.com/?utf8=>

```

The replacement not only fixes the immediate issue but also enhances the robustness of `validate_back_url`. It remains beneficial even after the patch in [#40190](#) is merged.

Committed the patch after I've committed the one from [#40190](#). [Go MAEDA](#), are you thinking to merge this to stable branches without the changes from [#40190](#)?

#14 - 2024-02-14 02:23 - Go MAEDA

- Target version changed from Candidate for next minor release to 6.0.0

Marius BĂLTEANU wrote in [#note-13](#):

[Go MAEDA](#), are you thinking to merge this to stable branches without the changes from [#40190](#)?

I think we don't need to merge this change to stable branches because the issue is very minor.
