Indeed. Tabs in the project settings page and the administration page already have rounded corner. Tabs in the project menu should have rounded corner as well in order to make the appearance consistent.

I've discovered a little flaw in the patch. It sets the border radius for the items in the dropdown menu, too. I don't think this was intended by Antonio. Attached is a patch to fix it. It also refactors the previous patch as the border radius can be set in one place.

Thanks for the heads up, I already did a fix to this in [#32100](#) but I guess Bernhard's version of this patch here is a bit better, so I will update the second patch in [#32100](#) to bounce off the new circumstances as well :D

I think we should add [#32100](#) as related to this ticket.

Oh sorry, I didn't noticed that...

I think we should add [#32100](#) as related to this ticket.

done ;-)
