<b>Description</b>			
In test/integration/api_test/attachments_test.rb and test/functional/attachments_controller_test.rb, calling the method set_tmp_attachments_directory at the tail of a method is unnecessary because the method is called in the teardown method (see <a href="source:tags/4.0.4/test/integration/api_test/attachments_test.rb#L37">source:tags/4.0.4/test/integration/api_test/attachments_test.rb#L37</a> and <a href="source:tags/4.0.4/test/functional/attachments_controller_test.rb#L33">source:tags/4.0.4/test/functional/attachments_controller_test.rb#L33</a> ).			
This patch removes the unnecessary calls to set_tmp_attachments_directory.
