#2 - 2019-10-02 06:36 - Go MAEDA

The warning can be observed only when the current directory is a working copy of the Subversion repo. It means that you obtained the source code of Redmine using "svn" command.

#3 - 2019-10-02 08:41 - Go MAEDA

It is caused by [r17407](#). Reverting the change fixes the issue.

- Related to Defect #28920: Redmine::VERSION::revision should take subversion_command setting into account added

#5 - 2019-10-02 09:00 - Go MAEDA

Here is a workaround.
