Redmine - Defect #32562

Issue Private Journals deleted when accessed from api

2019-12-06 17:32 - Jérôme BATAILLE

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	REST API		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	

Description

- An example request to trigger the issue : /issues.json?assigned_to_id=me&include[]=journals

The journals are deleted because a select! is done on model objects retrieved from a relation with the issues table.

A fix for **app/models/issue** :

```
# Returns the journals that are visible to user with their index
# Used to display the issue history
def visible_journals_with_index(user=User.current)
  result = journals.
    preload(:details).
    preload(:user => :email_address).
    reorder(:created_on, :id).to_a

  result.each_with_index {|j,i| j.indice = i+1}

  unless user.allowed_to?(:view_private_notes, project)
    # FIX select! deletes journals, because it comes from a relation !
    result = result.select do |journal|
      !journal.private_notes? || journal.user == user
    end
  end
  Journal.preload_journals_details_custom_fields(result)
  # Smile FIX select! deletes journals, because it comes from a relation !
  result = result.select {|journal| journal.notes? || journal.visible_details.any?}
  result
end
```

History

#1 - 2019-12-06 18:30 - Jérôme BATAILLE

- Status changed from New to Resolved

The problem does not come from a Redmine Core issue.

This issue can be closed !

#2 - 2019-12-06 18:46 - Marius BĂLTEANU

- Status changed from Resolved to Closed

- Resolution set to Invalid
