Resolution:	Invalid		

Description

Versions are sorted alphabetically by default. Depending on your versionning conventions is not really appropriate.

In my case, the version lifecyle is :

1.0.AplhaX
1.0.BetaX
1.0.RCX
1.0.0.GA

But in "Settings / Version" and Roadmap pages, the version 1.0.0.GA appears on top. It would be nice if we can choose the order of versions like we do with Forum.

History

#1 - 2009-05-08 18:48 - Zarooba Rozruba

Or by due date?

#2 - 2009-05-08 19:16 - Anonymous

I just give a try defining a due date for each version. Versions are now ordered by due date and following the convention specified above.

You can close the ticket.

#3 - 2009-05-19 20:32 - Eric Davis

- Status changed from New to Closed

- Resolution set to Invalid
