

Redmine - Defect #3348

Redmine with Webrick freezes

2009-05-13 09:02 - Matthieu Brucher

Status:	Closed	Start date:	2009-05-13
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	0.8.3
Resolution:	Invalid		

Description

Hi,

I've migrated from 0.8.1 with SQLite to 0.8.3 with MySQL, both time using Webrick as webserver. Everything worked fine with 0.8.1. It seems that Redmine sometimes crashes during the night, and I can't get a new page -> Redmine freezes.

When trying to shutdown the server by Ctrl+C, it doesn't work, I only see:

[2009-05-13 09:00:39] INFO going to shutdown ...

I have to kill the application completely to have another feedback which shows a multithreading issue:

[2009-05-13 09:00:51] ERROR ThreadError: not owner

Terminated

I'm using rails 2.2.2

History

#1 - 2009-05-13 18:05 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

Please, no deployment troubleshooting ticket here unless it's a **Redmine** defect.

#2 - 2009-05-26 13:32 - Matthieu Brucher

It seems other projects had the same issue, and they had fixed this in their code: <http://projects.reductivelabs.com/issues/1703>
