Target version:				

Description

If you have many Milsteons/Versions in one procect the Dropdown List is quite confusing.
To solve this problem a patch is attached to Hide all completed version in Ticket Create DropDown.

Another patch for #1245... :)

#2 - 2009-06-26 15:44 - Alejandro Scandroli

When updating older issues you can loss the "Target Version" because it's not in the list.
I've changed the f.select's parameter to include the current "fixed_version".

```
(@project.actual_versions.push(@project.versions.find(@issue.fixed_version)).sort.collect {|v| [v.name, v.id]}
),
```

This way you can edit older issues without deleting the "Target Version" by mistake.
