

Redmine - Feature # 342: local time zone support for SVN Viewer.

Status:	Closed	Priority:	Normal
Author:	Kyosuke Takayama	Category:	
Created:	2007-05-09	Assigned to:	
Updated:	2007-05-09	Due date:	

Resolution:

Subject: local time zone support for SVN Viewer.

Description: A date is time of UTC in "SVN repository". Because others are local time, I am troubled.

A date is time of UTC in "SVN repository".
Because others are local time, I am troubled.

Use localtime method, or every user should be able to set own timezone.

There is it in this way now.

```
