Can you be a bit more explicit and describe precisely (with words) what is the problem, and what is expected ? Thank you

#2 - 2010-06-27 18:39 - Tomasz Wysocki

Please type

```
bug example www.
```

into "Notes" textarea below and press "Preview".

It should be rendered as:

```
bug example www.
```

but will be as:

```
bug example www.
>
```

If you look into html you have following code:

```
<p>bug example <a class="external" href="http://www.&lt;/p">www.</p></a>>
```

Is it clear now?
