

Redmine - Defect #3699

Problem with sqlquery in journal.rb

2009-07-31 00:23 - Łukasz Żbikowski

Status:	Closed	Start date:	2009-07-31
Priority:	Normal	Due date:	
Assignee:	Eric Davis	% Done:	70%
Category:	Database	Estimated time:	1.00 hour
Target version:		Affected version:	0.8.4
Resolution:	Wont fix		

Description

I noticed that problem on IRC channel... then created that solution.
In Oracle DB RM throws SQL error.

It's caused by
"`#{Journal.table_name}.notes <> ""`"

In Oracle DB RoR text is translated to CLOB...
Unfortunately Oracle CLOB cannot be compared with string like that...

solution is:
`length(#{Journal.table_name}.notes)>0`

tested with PostgreSQL.
Should also work with other DB.

My diff (RM 8.4) in the attachment

+1

I have the same issue with Oracle. After applying this patch, the issue is fixed in Oracle for me as well. Thank you.

#2 - 2009-11-11 19:53 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Wont fix

Oracle is not supported. Sorry.
