

## Redmine - Feature #3711

### Extending Wiki Inline-images to include size parameters.

<b>Description</b> I think extending the inline-image tag to include width and/or height, or even % of size would be helpful.  I would think this would be a simple fix, but I've not worked a lot with Redmine.	
<b>Related issues:</b> Is duplicate of Redmine - Feature #1006: Display thumbnails of attached images <b>Closed</b> <b>2008-04-07</b>	

#### History

##### #1 - 2009-08-06 03:23 - Olafur Gislason

Looked a bit into this and see that this is handled through RedCloth 3.  
So this should actually not be done directly to Redmine.

This is possible with inline css styles in textile, but this feature is turned off due to XSS vulnerability since 0.8 version of Redmine.  
Syntax is `!{width: 50%;}image1.jpg!`  
see [#949](#) for solution

- Resolution set to Duplicate

Indeed, closed as duplicate of [#1006](#).
