<b>Description</b>			
With Rails 2.3.4, Engines are no longer able to override Redmine's routes. My new plugin should fix this: <a href="http://github.com/edavis10/prepend_engine_routes">http://github.com/edavis10/prepend_engine_routes</a>

Just did some more testing and it looks like this isn't needed at all, Rails is allowing plugins to override the routes in 2.3.4. If anyone else has this problem, please reopen this issue with your details.
