Target version:			
Resolution:	Duplicate		

Description

The idea of this request is to view the tags and branches beside or below (or maybe a balloon message?) related to a specific revision.
(since I have git in mind, it would be great to see something similar like the gitk --all presents in the header for specific revisions)

This would be specially useful at the associated revisions, as one can immediately see which branch,tag,... contains related changes to this tracker.

Unfortunately my programming skills are not mature enough to get that tackled :|

thanks,
bernhard
