Redmine - Patch #39109

Improving Test Reliability with Capybara Assertions

2023-09-24 17:38 - Takashi Kato

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	Marius BĂLTEANU	**% Done:**	0%
Category:	Code cleanup/refactoring	**Estimated time:**	0.00 hour
Target version:	5.1.0		

Description

According to Capybara's documentation, Capybara will automatically wait until the HTML condition is met if you use the assertions provided by Capybara.
The current Redmine system test includes a section that is sometimes unreliable, known as a "flaky" part, which may or may not succeed during runtime.

By giving preference to the use of Capybara's assertions, it is possible to mitigate the test's flakiness.
