

Redmine - Feature #3936

configurable list of models to include in search

2009-09-28 09:56 - Luca Pireddu

Target version:	1.0.0 (RC)		
Resolution:	Fixed		
Description			
It would be nice to be able to configure (and especially add to) the list of object types that the search engine considers. At present the list is hard-coded in the search controller			
For an in-house customization I needed to include a new searchable model class into the search engine. To do this I had to override the SearchController#index method, but it would have been nice to be able to modify a configuration parameter to simply add a new model type to the @object_types array.

Revision 3444 - 2010-02-17 21:05 - Jean-Philippe Lang

Makes search providers extensible (#3936).

History

#1 - 2010-02-17 21:40 - Jean-Philippe Lang

- Target version set to 1.0.0 (RC)

#2 - 2010-05-03 20:58 - Alex Bevilacqua

Just out of curiosity, how would I use this change to add search functionality from a plugin?

#3 - 2010-05-08 13:40 - Holger Winkelmann

will this also address search (fulltext) capabilities for the repositories ?

#4 - 2010-06-15 00:54 - Eric Davis

- Status changed from New to Closed

- Resolution set to Fixed

It appears that this is complete.

If you put this into your plugins' init.rb, this should add the Deliverable model:

```
Redmine::Search.map do |search|
  search.register :deliverables
end
```

#5 - 2010-12-21 06:00 - Mischa The Evil

More info about how to implement this in a plugin can be found on [#3021 #note-4](#).
