

Redmine - Defect #3979

bad strings in notification messages

2009-10-06 19:23 - alexander smishlajev

Status:	Closed	Start date:	2009-10-06
Priority:	Normal	Due date:	
Assignee:	Azamat Hackimov	% Done:	0%
Category:	Translations	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Fixed		

Description

When a file is added to or deleted from an issue, issues_helper.rb builds (part of) notification message by the following code block:

```
case detail.property
when 'attr', 'cf'
  if !detail.old_value.blank?
    l(:text_journal_changed, :label => label, :old => old_value, :new => value)
  else
    l(:text_journal_set_to, :label => label, :value => value)
  end
when 'attachment'
  "#{label} #{value} #{l(:label_added)}"
end
else
  case detail.property
  when 'attr', 'cf'
    l(:text_journal_deleted, :label => label, :old => old_value)
  when 'attachment'
    "#{label} #{old_value} #{l(:label_deleted)}"
  end
end
end
```

String composition like "#{label} #{value} #{l(:label_added)}" is not valid for non-english locales. The string template should be translated in a whole.

Associated revisions

Revision 2907 - 2009-10-10 13:11 - Jean-Philippe Lang

Completes r2856 (#3979).
