Description

I have recently upgraded Redmine from version 3.4.6 to 5.0.5. The Google reCAPTCHA plugin we were using earlier is no longer supported, as it relies on deprecated requirements and did not install properly in the new version.

I attempted to install the older plugin we were using, but it resulted in an error due to deprecated requirements. Additionally, I have searched the Redmine plugin repositories, but I could not find any Google reCAPTCHA plugin that is compatible with version 5.0.5. So, could anyone provide a Google reCAPTCHA plugin that is compatible with version 5.0.5?
