

Redmine - Defect #4056

Rename named_scope :public for Project to something else

2009-10-19 19:30 - Dmitri Kouikoff

Status:	Closed	Start date:	2009-10-19
Priority:	Normal	Due date:	
Assignee:	Eric Davis	% Done:	100%
Category:	Projects	Estimated time:	0.00 hour
Target version:	0.9.0	Affected version:	
Resolution:	Fixed		

Description

As the word public is reserved in ruby, the attempt to mock/stub the model Project fails, since the line that introduces a new public method fails due to the fact that word 'public' is redefined by the named_scope.

I suspect you may meet the case while setting up the shoulda.

Revision 2941 - 2009-10-21 05:21 - Eric Davis

Renamed Project#public named_scope so it will not override Ruby's public method

#4056

History

#1 - 2009-10-20 02:54 - Eric Davis

- Category set to Projects
- Status changed from New to 7

Agreed. I ran into this when I would mock Project.public in my tests. What do you propose renaming it to? Project.public_projects? Project.all_public?

#2 - 2009-10-20 07:36 - Dmitri Kouikoff

I think :all_public is pretty good. As a variant I was thinking about :public_state. :-)

#3 - 2009-10-21 05:17 - Eric Davis

- Status changed from 7 to Closed
- Target version set to 0.9.0
- % Done changed from 0 to 100
- Resolution set to Fixed

Project.all_public it is. Thanks for the suggestion. [r2941](#)
