Description

I was trying to make the upgrada from my current version so I did an svn update , the i ran the migration scripts and everything was fin until I tried the login and my password didnt work.

Im running:
ruby 1.8
rails 2.3.4
ubuntu 8.0.4

So i wasnt able to conclude the migration and had to revert the system to the previous point.
I also tries a dict checkout from the trunk and from the 0.8.5 tag and the result were the same , Have something changed in the way that the password is checked?

History

#1 - 2009-11-11 16:10 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

Have something changed in the way that the password is checked?

No.
