

Redmine - Defect #4125

Error in wiki with <pre> tag

2009-10-27 17:11 - Isaac Cruz Ballesteros

Status:	Closed	Start date:	2009-10-27
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:	0.8.7	Affected version:	
Resolution:	Fixed		
Description			
There's an error in wiki when the preformatted text is a xml and has a tag that starts with the string 'pre'. It seems to be searching the string '< pre' (without the space). Here's an example:			
<pre><prepared-statement-cache-size>32</prepared-statement-cache-size></pre>			
Next line, it should be outside the 'pre'
