Redmine - Feature #4137

Use Gravatar ident icons instead of default "G" icon

2009-10-29 14:02 - Sebastian M.

Description
I suggest to display Gravatar's ident icons instaed of the default icon when a user has no picture uploaded. Each user gets his very own unique icon automatically calculated by his email adress! This can be done very simple by adding a single parameter to the gravatar url! Please read here: http://blog.gravatar.com/2008/04/22/identicons-monsterids-and-wavatars-oh-my/

Related to Redmine - Patch #2734: Use wavatar as a default for gravatar images	**Closed**	**2009-02-12**

History

#1 - 2009-10-29 14:12 - Sebastian M.

This can customize this right now by changing the following line in **gravatar.rb**:

Change
~~:default => nil,~~ to :default => 'identicon',

But I think it may be a good idead to turn this on by default.

Nice find, Thanks Sebastian!

#3 - 2009-10-29 15:38 - Felix Schäfer

See #2734 for a patch to get the option in the Administrator section.
