Description	
If we have a comment in subversion like this: issue #245 ; fixed the problem The URL for the link includes the semi-colon and the link text does not: issue #281 Clicking on these links generates a 404 error. Thanks!

#1 - 2007-04-12 10:23 - Pavol Murin

Fix: it is necessary to add a space after the link, as the word boundary might be a character. I fixed it in the following way:

change in app/helpers/application_helper.rb:

line 122:

```
text = text.gsub(/#\d+(?=\b)/) {|m|
  "\"##{$1}\".\"\" + url_for(:controller =>
  'issues', :action => 'show', :id => $1) }
```

to:

```
text = text.gsub(/#\d+(?=\b)/) {|m|
  "\"##{$1}\".\"\" + url_for(:controller =>
  'issues', :action => 'show', :id => $1) + " " }
```

and line 127:

```
text = text.gsub(/r\d+(?=\b)/) {|m|
  "\"r##{$1}\".\"\" + url_for(:controller =>
  'repositories', :action => 'revision', :id => @project.id,
  :rev => $1) } if Herve Harster
```

to:

```
text = text.gsub(/r\d+(?=\b)/) {|m|
  "\"r##{$1}\".\"\" + url_for(:controller =>
  'repositories', :action => 'revision', :id => @project.id,
  :rev => $1) + " " } if @project
```

muro

#2 - 2007-04-22 07:00 - Jean-Philippe Lang

Fix committed.

Instead of generating textile links, html links are directly generated.

eg.

```
text = text.gsub(/#\d+(?=\b)/) {|m| link_to "##{$1}",
  :controller => 'issues', :action => 'show', :id => $1 }
```
