

## Redmine - Defect #4303

### How to assign customer (or any custom fields) only to issue in selected project

2009-11-27 20:16 - Marcin Nikt

<b>Status:</b>	Closed	<b>Start date:</b>	2009-11-27
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Category:</b>	Custom fields	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	0.8.7
<b>Resolution:</b>	Invalid		
<b>Description</b>			
Hi All We use Redmine 0.8.7. The problem is:			
<ul style="list-style-type: none"><li>• In my Redmine I added custom field - "cust". This is a list of my customers. It is setup not "For all project".</li><li>• In Redmine I have one project: TTCustomer - it is special project only for my stuff. Each issue is connected with any customer - we use field "cust" in each issue.</li><li>• I have some customers with access from outside our company. They have own projects in my Redmine. For example "abc", "cde" etc.</li></ul>			
I need something like that:			
<ul style="list-style-type: none"><li>• on list of issue in each project (or only in TTCustomer) I need column "cust" and possibility of filtering and grouping (I know it is easy when I checked checkbox "For all project" in definition of "cust")</li><li>• my customer should not see that field or they can but only in their own projects (in that case there will be their name)</li><li>• in new issue in project "TTCustomer" there should be field "cust" with full list</li><li>• in new issue in other projects (or in project of my customers) there should not be that field or may be but with only with name of selected customer</li></ul>			
It is possible at all ? Please help me.			
Sorry for my bad english.			
Best regards Marcin			

## History

Why a defect?

### #2 - 2009-11-27 20:51 - Marcin Nikt

- Status changed from New to Resolved

- % Done changed from 0 to 100

Sorry it is not defect but it is hard to setup ;) Sorry, sorry.

Ok - I resolved this problem.

1. In project "TTCustomer" settings I added custom fields "cust"
2. Next in Issues I added filtr on field "cust"
3. In filter I unchecked "default columns" and "cust" in filter definition
4. In Columns list I selected "cust" field and moved it to right side
5. I saved this filtr as "custcolumn"

And now I have "cust" column only in this project ;) So if I want to see "cust" column in list of issues I click "custcolumn" from custom queries and it works ;)

It is related to: <http://www.redmine.org/boards/2/topics/5555>

Thank you for redmine and sorry for "defect".

- *Status changed from Resolved to Closed*

- *Resolution set to Invalid*

OK, thanks for the feedback.

Looks like you found a solution, so I close this ticket.
