

Redmine - Feature #4326

Aggregate Multiple Issue Changes for Email Notifications

2009-12-03 15:02 - Richard Schulte

Status:	New	Start date:	2009-12-03
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description This is not to be confused with another useful proposed feature that would do digest emails for notifications. This would aggregate a group of changes to the same issue over a specified period of time (say 5,10,20, minutes) into one email notification. This is for all those times when you are watching an important issue and you receive 6 emails in 5 minutes as various people make and save various changes to the same issue. Not everyone has gmail to combine those all for them.

- Not dup.
[#8409](#) is for "bulk edit issues".
- #4 - 2023-12-05 12:30 - Ondrej Svejksky**
The [#8409](#) issue is indeed dedicated to solving bulk issue edit notifications. If anyone is still interested, we do custom plugins and a "Redmine Kickstarter" where you can co-fund a development of any Redmine plugin. We cover 50% of the dev costs, and the rest is evenly spread among all participants. Ping Michael at <https://www.redmine-x.com/redmine-kickstarter>
