

Redmine - Defect #4392

wiki style `<pre> </pre>` rendering

2009-12-14 11:21 - Felix Woldt

Status:	Closed	Start date:	2009-12-14
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	0.8.6
Resolution:	Duplicate		
Description			
<p>I don't know if this is a bug or feature.</p> <p>I wonder that text enclosed in the <code><pre> </pre></code> tag is rendered with the wiki syntax. I think this is not good.</p> <p>For example i try to make a dokumentation of a textstyle which is similar to the wiki syntax of redmine</p> <p>In this style i use <code>_</code> to mark variables</p> <pre>[[variable_1]] => [[variable_1]] [[variable_2]]</pre> <p>But the brackets are rendered as wiki syntax and a link to an wiki page is generated. It would be nice that all text inside the <code>pre</code> tag is not rendered!</p> <p>Thank's</p>
