

Redmine - Defect #4408

Huge dropdown kills browser: dropdown for username in Project Settings -> Members -> add member

2009-12-15 22:38 - Beat

Status:	Closed	Start date:	2009-12-15
Priority:	Normal	Due date:	
Assignee:		% Done:	0%

Target version:		Affected version:	0.8.7
Resolution:	Duplicate		
Description			
Description			
On our redmine forge of our open-source project we have now over 72'000 users auto-registered. We can't assign users anymore to projects without doing it directly in the database in the members table:			
Reason is that the Username selection drop-down list to add a user with a role to a project has over 72'000 entries, and that crashes any reasonable browser.			
To reproduce bug:			
<ol style="list-style-type: none">1. create a project2. create 100'000 active users in the database3. then go to the project -> Settings tab -> Members sub-tab4. then try adding one of the 100'000 users to the project using the drop-down			
Safari and Firefox will be blocked for hours (didn't try to wait more than 3 hours, just killed it).			
Suggested fix			
Probably an auto-complete field for username selection, instead of a drop-down when there are over let's say 200 members would make sense, similar to this similar fixed issue: #3350
