Target version:			
Resolution:			
Description			
It would be very useful to have the functionality to synchronize 'cases' in Salesforce.com with the issue tracking system in Redmine.			
Thank you, Tauseef

Hi,

Is there currently a way to create link between Salesforce contacts and RedMine issues ?

Thanks for your help.

#3 - 2012-05-04 20:21 - Sri Ramireddy

Does any know if there is consulting service which can help us build this redmine to salesforce interface plug-in ? We use both the systems and are in need of this plugin. If not, we need to move to another issue tracking system like JIRA which has a connector available.

Hi, such a plugin would be very useful for us too. We really need a plugin to allow redmine issues/timesheet/agenda to synch with salesforce, or outlook as from outlook to salesforce it is possible already.

Perhaps we should develop it by ourselves ?

We need Ror developers for the redmine side, and apex for salesforce's ? am i right ?

These two issues are linked in a way : <http://www.redmine.org/issues/1693>

I created such a plugin for [Trac](#) located here:

<http://trac-hacks.org/wiki/TicketToSalesforcePlugin>

Although I have done a little work with Redmine plugins, it's not currently something I'm fluent in. I may do so when my job work load goes down a bit.
