

Redmine - Defect #4501

URL-mangling provides data not reachable through UI

2009-12-29 01:15 - Mischa The Evil

Status:	Closed	Start date:	2009-12-29
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description I noticed that with some URL-mangling it is possible to gather information which is not "un-locked" by the Redmine UI. E.g. the following URL gives me Eric Davis' watch-list: <code>http://www.redmine.org/issues?set_filter=1&sort=updated_on:desc&watcher_id=5</code> Although pretty unharmful, it might be unwanted behaviour.			

History

#1 - 2010-07-09 16:04 - Felix Schäfer

- Status changed from New to Closed
- Resolution set to Invalid

I don't think it is because you will still only see issues you have the right to see, I don't think information you can't get to with the normal UI is so sensitive that it needs to be filtered out.

#2 - 2018-07-08 13:35 - Marius BĂLTEANU

- Related to deleted (Feature #8160: Extend watched_by_me-issue filter to include all project-members instead of only <<me>>-substitution)
