**Description**

Specific URL:

`http://foo.bar/auth_sources/list`

Related Code(app/views/auth\_sources/list.rhtml)[]

```
<%= link_to l(:button_delete), { :action => 'destroy', :id => source },
                                     :confirm => l(:text_are_you_sure),
                                     :class => 'icon icon-del',
                                     :disabled => source.users.any? %>
```

The link\_to method does not contain :disabled options.  
I think this problem is caused by code change(button\_to have been replaced by link\_to).
