

Redmine - Patch #4609

Plugin generators should display help if no parameter is given

2010-01-19 13:10 - Jean-Baptiste Barth

Target version:	0.9.4		

Description

I was sure I reported this before but cannot find the issue here on redmine.org...

In most (all?) standard generators, if no parameter is given, the help is displayed. I often rely on this when generating models/controllers, but I get an error with 2 redmine generators :

```
% ruby script/generate redmine_plugin_model
undefined method `underscore' for nil:NilClass
% ruby script/generate redmine_plugin_controller
undefined method `underscore' for nil:NilClass
```

OR (on an other machine) :

```
% ruby script/generate redmine_plugin_controller
You have a nil object when you didn't expect it!
The error occurred while evaluating nil.underscore
```

I leave a tiny, tiny patch.

NB: redmine_plugin is not affected by such a bug since "super" is called at the beginning of the initialize() method.
