Redmine - Feature #4670

Fine tune "New Issue"

Target version:				
Resolution:	Duplicate			

Description

Why can anybody (=any role) assign a due date, etimated time, %done, assigned to, or target version for an new issue? This makes sense only for the developers themselves and is unintersting (best) or confusing (worse) for the bug/feature reporters.

As it seems, even redmine has problems with this, as you put these 2 lines in "SubmittingBugs":

- please **DON'T** fill the target version field: let the developers decide when integrate
- please **DON'T** assign the feature request to anybody, let the developers deal with it

It is possible already to add custuom fields, so why not making the default fields deletable?

best regards,
jakob

I am very happy to have finally found a tool that ties together the vital parts of project(s) management as well as redmine does. Great Job! I am in the process of standing up a version with many external contributers and a need to manage the content of incremental baselines. Due to the number and diversity of contributers on our project, the features of and changes to a target version must be tightly controlled by a configuration control board. This issue means that the board must extend extra effort to guard against any redirection of issues.

#5 - 2013-03-20 16:40 - Dipan Mehta

This is yet another duplicate of [#703](#) + [#12005](#)

#6 - 2013-03-25 03:15 - Toshi MARUYAMA

- Category set to Issues

#7 - 2017-03-11 05:42 - Go MAEDA

- Is duplicate of Feature #703: Configurable required fields per tracker/status/role added

#8 - 2017-03-11 05:42 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Duplicate

Implemented by [#703](#) (Redmine 2.1.0).
Administrators can make fields read only / required in workflow page.
