

Redmine - Defect #4694

Stop CGI from being the default apache rails serving mechanism

2010-01-30 22:33 - Kamil .

Status:	Closed	Start date:	2010-01-30
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Fixed		
Description After upgrading from 0.8.5 to 0.9.1 I have obtained: <code>Internal Server Error</code> The server encountered an internal error or misconfiguration and was unable to complete your request. Please contact the server administrator, [no address given] and inform them of the time the error occurred, and anything you might have done that may have caused the error. More information about this error may be available in the server error log It turned out that the reason was line 11 in the REDMINE_DIR/public/.htaccess file: <code>Options +FollowSymLinks +ExecCGI</code> Commenting it solved the problem regards

History

- #1 - 2010-07-10 23:45 - Felix Schäfer
 - Subject changed from Internal server error after upgrade to 0.9.1 to Stop CGI from being the default apache rails serving mechanism
 - Assignee set to Felix Schäfer
- #2 - 2011-01-15 09:48 - Felix Schäfer
 - Assignee deleted (Felix Schäfer)
- #3 - 2015-04-05 09:54 - Go MAEDA
 - Status changed from New to Closed
 - Resolution set to Fixed

'htaccess' was renamed to 'htaccess.fcgi.example' by [#7256](#) (Redmine 1.1.1) so Apache does not read it by default. We can close this issue.
- #4 - 2015-04-05 09:55 - Go MAEDA
 - Related to Defect #7256: redmine/public/.htaccess must be moved for non-fastcgi installs/upgrades added
